

"Sabrina's Cafe, Wynnewood, PA"

A Philly favorite continues to grow...

Sabrina's Café has created a mark for itself on the Philly food scene by serving some of the best brunch in the city. When owners Robert and Raquel DeAbreu decided to add a fourth Greater Philadelphia location, The Barnett Group jumped at the chance to be involved. The new 2,400 square foot design-build fit out transformed a former Wynnewood, PA diner into a fresh, hip café. The renovated space, featuring bright canary yellow walls complimented by cobalt blue accents, is in line with the spirited aesthetic found at the other three restaurant locations. Light wood floors combine with chic light fixtures and dynamic Philly-centric blackboard art to create a bright, lively energy. The family-owned and family friendly eatery is a welcome addition to the community, bringing a little bit of the city to the suburbs.

Scott's thoughts: Food... glorious food.

I love to eat.

One of the great things about being in the restaurant-building business is that very often they have a "soft-launch" prior to opening. It's a kind of dress rehearsal. An opportunity for management to put the entire dining experience together for the first time in front of a hand-picked group of guests. The staff, the food, the entertainment, and the building suddenly come alive. But the best part is that very often, the folks here at The Bannett Group are invited to attend. And that's the part I *really* like.

We've been building a lot of restaurants lately. Which means I've been eating *really* well.

I thought I'd take a moment to tell you about a handful of our most recent restaurant projects. We couldn't be prouder about how each of them turned out. Check out our website for more images. But don't forget to stop by in person and grab a bite the next time you find yourself near one.

And please... tell them we sent you. Because I really, really want to do more of these. Enjoy!

WINGS, BEER & FOOTBALL. It just doesn't get any better than this...

It's been only 3 years since we began our relationship with **Buffalo Wild Wings Grill & Bar®** (Nasdaq: BWLD), the NY style wing joint and sports bar chain. It has since become one of the top 10 fastest growing restaurant brands in America, and The Bannett Group has become one of its most trusted and reliable general contractors. To date, we've worked hard to win 19 projects awarded by the company and its franchisees.

Our most recent projects followed the new "Stadia" design – a concept in development since 2011. Windows above the bar area provide an increase in natural light, while optimal placement of TVs and better acoustics combine to foster excitement around the bar and enable conversations at normal volume. Rockhill serves up Philly version 2.0

Believe it or not, the classic Philly cheesesteak has been much harder to find in recent years than it was when I was growing up. One of the legendary local joints my dad and I would go to pick up a good one had been shuttered and crumbling for almost a decade. So when local restaurateur Andrew Welder told me he wanted us to design and build a new legend called "Rockhill" in its place, I told him to count us in faster than you could say "Gimme one wit' whiz!"

The decaying old building was soon replaced with a edgy, new space that ushers fresh energy to the neighborhood. Rockhill brings the pride back to classic Philly fare. And the best part... it's just down the street from our office!

zoës Kitchen Mediterranean food. Southern hospitality.

One of our newest restaurant clients is among the fastest growing in the already dynamic fast-casual restaurant segment. **Zoës Kitchen** (NYSE: ZOES) offers Mediterranean-inspired dishes delivered with Southern hospitality. At Zoës, guests enjoy everything from hummus, made fresh daily and served with warm pita bread, to flavorful salads and kabobs all made from simple ingredients such as

raw vegetables, fruits and legumes. You won't find a microwave or fryer anywhere in its restaurants.

Zoës' new location in Cherry Hill, NJ occupies a portion of a multi-tenant property. With renovations and alterations being made to the entire property and site, the project required

careful logistical coordination to make sure the needs and schedule of both the client and landlord were met.
